Installing components for WebXtender

Components will be needed in WebXtender in order to activate the interactive viewer. This includes rubber stamping.

In Internet Explorer go to WebXtender: http://imaging.georgiasouthern.edu

Log in using your Banner user name and password.

Data Source should remain PROD

Click on Help then Check Installed Components
Nothing will be showing under the Current installed status. Click on icon beside each one to install. Follow thru with installation wizard.

You may receive error: This website wants to install the following add-on: ‘XSComponentCheck.cab’ from ‘EMC Corporation’. If you trust the website and the add-on and want to install it, click here…

Go ahead and click it.

Then you should see that all four components are installed.
Close your window.
